Order Information

1. Business Name	2. Customer #	3. Order PO #	4. Job Name
5. Cabinet Number	6. Cabinet Description	7. Intermediate Rail Width	
Cabinet number as it appears on the associated order form	Cabinet SKU as it appears on the associated order form (E.g.: BWD33)	Select 3" or 1 1/2" intermediate rail width	

Appliance Information

8. Appliance Maker	9. Appliance Model Please include the complete appliance model number
--------------------	--

Cutout Information

- Cutout widths will be obtained by the use of fillers
- To avoid the use of fillers, the cabinets may be ordered 3" wider than the cutout width at no extra charge
- Openings larger than 3" less the width of the cabinet must be field cut (*Maximum 1 1/2"*)
- Cutout dimensions or make & model of unit must be supplied
- If no intermediate rail size is selected, intermediate rail will be 3"
- For base warming drawer cabinets, the distance from the bottom of the oven to the floor is required
- Warming drawer clearance requirements are the purchaser's responsibility
- W. W. Wood Products, Inc. is not responsible for any clearance or venting requirements
- This completed specification sheet must be submitted with a standard Shiloh order form (*SHI-SOF*)
- This specification sheet will not be accepted singularly or as an order form

Customer Acknowledgment and Responsibility Agreement

By signing below, I acknowledge and understand that W. W. Wood Products, Inc. is not responsible for any inaccuracies or errors in appliance cutout specifications. It is solely my responsibility as the purchaser to ensure that all appliance cutout, clearance and venting requirements are correct for the cabinets being ordered.

I further acknowledge and agree to provide the manufacturer's flush installation appliance specifications at the time of purchase. I understand that failure to submit these specifications may result in installation issues for which W. W. Wood Products, Inc. will not be held liable.

I have read and fully understand the above terms and conditions.
