Appliance Information

9. Appliance Maker	10. Appliance Model Please include the complete appliance model number
--------------------	---

Cutout Information

- Left and right frame stiles are 1 1/2" only and not adjustable
- Cabinet must be ordered 3" wider than minimum flush inset oven width cutout on manufacturer's specification sheet
- Subframe's depth is adjustable using slotted brackets and is black painted hardwood
- If no intermediate rail(s) size is selected, intermediate rail(s) will be 3"
- Manufacturer's appliance flush installation specifications must be supplied with order
- For flush inset utility oven cabinets, the distance from the bottom of the oven to the floor is required
- Oven and microwave clearance requirements are the purchaser's responsibility
- W. W. Wood Products, Inc. is not responsible for any clearance or venting requirements
- This completed specification sheet must be submitted with a standard Shiloh order form (*SHI-SOF*)
- This specification sheet will not be accepted singularly or as an order form

Customer Acknowledgment and Responsibility Agreement

By signing below, I acknowledge and understand that W. W. Wood Products, Inc. is not responsible for any inaccuracies or errors in appliance cutout specifications. It is solely my responsibility as the purchaser to ensure that all appliance cutout, clearance and venting requirements are correct for the cabinets being ordered.

I further acknowledge and agree to provide the manufacturer's flush installation appliance specifications at the time of purchase. I understand that failure to submit these specifications may result in installation issues for which W. W. Wood Products, Inc. will not be held liable.

I have read and fully understand the above terms and conditions.
